Handling Table Data (Update and Delete)

- UPDATE Syntax:

```
UPDATE table_name
```

```
SET column1 = value1, column2 = value2, ...
```

```
WHERE condition;
```

- Write a query to change the species snake name as 'Fat'.
 - Write a query to change the species sex as 'male' which were born after 1990.
 - Queries:
 - UPDATE pet SET name = 'Fat' WHERE species = 'Snake';
 - UPDATE pet SET sex = 'M' WHERE YEAR(birth) > 1990;
-

- DELETE Syntax:

DELETE FROM *table_name* WHERE condition;

- Write a query to delete the species record from the table which were born at 29th of April, 1996.
- Write a query to delete the species record from the table where the owner name is Gwen and born after 1995.

- Queries:

- **DELETE FROM pet WHERE birth = '1996-04-29';**
 - **DELETE FROM pet WHERE owner = 'Gwen' AND YEAR(birth) > '1995';**
-
